ABOUT ME

Bridge between devs and designers
5+ years of Frontend and 10+ years of Web design experience, including development of design systems via Storybook and team leadership.

WORK EXPERIENCE

[Jul 2022 – Current]   **Frontend Developer & Lead Designer**

Scalo

City: Wrocław | **Country:** Poland

Scalo is a leading software house based in Poland, offering bespoke software solutions and agile development teams to drive business growth.

- Created a **Storybook component library** to streamline project structure and design consistency, providing a single source of truth for the entire team and optimising project workflows.
- Developed custom styles using **SCSS**, based on **Angular Material components**, to align the UI with project-specific design requirements, ensuring a cohesive and polished appearance across the application.
- Designed and implemented **frontend interfaces for internal services used by bailiffs**, simplifying their workflows and automating routine processes to improve efficiency and user satisfaction.
- Maintained **updated npm package versions** and implemented extensive **code refactoring** to modernize legacy code, improving performance, stability, and maintainability.
- Ensured **cross-browser compatibility** and maintained a high standard of code quality, visual accuracy, and performance across multiple devices and platforms.

[Feb 2022 – Nov 2023]   **Frontend Developer & Lead Designer**

Igluu.cz

City: Prague | **Country:** Czechia

Igluu will offer digital tools and an MLS ecosystem for the Czech real estate market, already used by over 350,000 real estate professionals and financial brokers in the USA and Canada.

- **Developed, maintained, and optimised the company's website**, ensuring seamless functionality, aesthetic appeal, and cross-browser compatibility.
- Created a **Storybook component library based on Mantine**, enabling a standardised, reusable set of components to enhance code efficiency and consistency across applications. Successfully published updated versions to npm for team-wide use.
- Developed a new **service within the application** that provided users with a consolidated view of their financial data—including loans, mortgages, and

outstanding balances — streamlining access to critical information within Igluu platform.
- **Mentored and supported designers and junior frontend developers**, providing training on UI/UX best practices and fostering a collaborative team environment.
- Continuously **improved the existing design and UX** based on user feedback and best practices, then personally implemented these updates in code to maintain an optimal user experience.

[Apr 2019 – Current] **Frontend Developer & Designer**

Freelance

City: Wrocław | **Country:** Poland

- Fully designed, developed, and launched a user-friendly website for oncology clinic in St. Petersburg using Next.js. This site quickly gained recognition as a model of excellent design and has since been adopted as a template by several other clinics across St. Petersburg and beyond.
- Assisted various companies in creating Storybook component libraries (React), promoting design consistency and efficiency across their projects.
- Created several small, custom websites for diverse clients, including a music company, a solo artist, and a welding and installation firm, each tailored to the client's unique brand and style to provide an inviting online presence.

[Apr 2019 – Mar 2022] **Frontend Developer & Designer**

SmarTech IT

City: Wrocław | **Country:** Poland

SmarTech IT specializes in comprehensive cybersecurity services, leveraging over 15 years of experience in government and military projects. The company developed its own Security Operations Center (SOC) and actively participates in national cybersecurity initiatives.

- Joined the project when the initial design was already in place and took on the challenge of **creating a more intuitive, refined second version** of the interface. Personally coded and adapted it for all screen types, carefully attending to every detail to ensure consistency and usability.
- **Streamlined the user journey**, simplifying navigation and making key functions more accessible, which significantly improved user satisfaction and ease of use.
- Actively contributed to new feature development by **designing and building pages from scratch**, adding valuable functionality and expanding the platform's potential.
- Undertook a complete **redesign of the user registration page and admin panel**, creating a smoother and more user-friendly experience for both customers and administrators.
- Addressed and resolved **numerous bugs** while continuously refactoring code, resulting in a cleaner, more efficient codebase that enhanced performance and maintainability.
- Developed a **custom universal email template** and provided ongoing support, ensuring consistent design across all email clients.
- Ensured **cross-browser compatibility** and maintained high standards of code quality, visual precision, and responsive UI across all devices.

[May 2018 – Mar 2019] **Design Developer**

Diehl Controls

City: Wrocław | **Country:** Poland

Diehl Controls is a top player in the high-tech HVAC/R and appliance industry, churning out a remarkable 50 million electronics every year across Europe, Asia, and North America.

- Developed and optimized **industrial UX designs** and **visual interfaces (UI)** tailored to device constraints, including microchip performance and display specifications.
- Designed a **control panel interface for ASKO's premium washing machine**, enhancing user accessibility and aesthetics to align with the brand's luxury standards.
- Created an **aircraft lighting control panel interface**, streamlining user interaction for improved operational efficiency and ease of use in complex environments.
- Led the design of **premium oven and coffee machine interfaces** for commercial use in malls, ensuring a user-friendly experience with robust, intuitive control layouts.
- Developed graphics for **air humidifiers, wine coolers, and dishwashers**, focusing on cohesive brand identity and seamless interaction flow.
- Created interactive demo prototypes in **TouchGFX**, allowing stakeholders to experience and test designs in a simulated environment before production.

EDUCATION AND TRAIN-ING
